Doosan Infracore America Forklift dealers successfully operate in over 220 service and sales places throughout Canada and the U.S. The forklift product line remarkably includes 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various truck versions range from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest expanding lift truck company in the North American market, thanks to their reliability in maintaining a high degree of client service quality and optimum product performance to all Doosan Infracore Forklift users. The U.S. lift Truck division located in Cleveland has a professional team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original domestic lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national equipment expansion project. Initial sales of this industrial equipment focused on large business communities, the armed forces and on state-run corporations. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education became the new focus for enhancing quality and product development.

Daewoo began the first domestic forklift business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological advancements combined with sales success placed them in a position of significant expansion of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the very competitive North American materials handling industry. This project proved highly profitable for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed construction of a new facility to help in producing high end value-added goods for export. In 1993, the company had a international sales network and started exporting versions they had developed through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas marketplaces.
